Market Week: June 1, 2026

The Markets (as of market close May 29, 2026)

Wall Street ended the week with broad gains, record-setting index performances, and a notable shift toward broader market participation beyond tech and AI shares. The Dow, the S&P 500, the NASDAQ, and the Global Dow each finished the week higher. The S&P 500 extended an eight-week winning streak, while the Dow recorded new highs. Markets swung throughout last week as news alternated between progress and tension in the U.S.-Iran ceasefire negotiations. Reports of a potential ceasefire helped ease oil-supply fears, influencing sharp moves in oil prices and Treasury yields.
